

Month-End Close Checklist and Procedure

Doc ID: SOP-CLOSE-001 | Version: 3.0 | Effective: 2024-09-01 | Category: Period Close

Purpose

This checklist standardizes the steps required to close an accounting period in Yardi Voyager and produce reliable property financial statements.

Close Timeline

The standard close calendar targets a five-business-day close. Day one begins on the first business day after period end. All property books should be closed and locked by end of day five.

Pre-Close Tasks (Days 1-2)

All vendor invoices for the period must be entered and approved before the AP subledger is reconciled. Confirm that no invoices remain in the PayScan queue with a service date in the closing period. Post all recurring rent charges and verify that escalations effective in the period have been applied. Record accrued expenses for goods or services received but not yet invoiced.

Reconciliations (Days 2-4)

The following control accounts are reconciled every month before close:

Account	What to Verify
Accounts Receivable	Subledger ties to GL; aging reviewed
Accounts Payable	Subledger ties to GL; no stale items
Security Deposits	Held balance ties to active lease deposits
Prepaid Expenses	Amortization recorded for the period
Cash - Operating	Bank reconciliation completed and signed off
Suspense / Clearing	Zero balance confirmed

Review and Validation (Day 4)

Validate that Net Income on the income statement matches the change in Retained Earnings on the balance sheet to confirm there are no roll-forward errors. Review the income statement against budget and investigate variances above the reporting threshold. Confirm that post month dates on all transactions match their transaction dates.

Lock and Distribute (Day 5)

Once reconciliations are complete and variances explained, the Controller locks the period in Voyager to prevent further posting. Final financial statements and the variance commentary are distributed to the regional manager and asset management.

Reopening a Closed Period

A locked period may only be reopened with Controller approval and a documented reason. Any entry posted into a reopened period must be communicated to anyone who already received the original financials.
